

A beautiful finish to any pool, Naturally.

Colour Range - Available in two Styles of Pebbles

Original - Natural Looking Finish - The original size, which produces a pleasantly textured surface provides a natural appearance which can be used to great effect for beach entries and in combination with natural rock.

Pebblesheen - Classic looking Finish - A smaller grade of pebble produces a flatter smoother surface for more traditional pools.

There will be a slight difference between the colour of these pictures and the actual finish when applied to the pool surface. Photographed pools and colour samples are affected by the type of light, surrounding colours, angle of light, shadows, etc in which they are photographed, screen resolution or paper on which they are viewed or printed, quality of download or printing process, etc. We cannot guarantee that your pool colour will be the same colour as the pictures viewed.

Water colour is determined by numerous factors, so we strongly suggest you view pools before deciding on a colour. Your pool builder/applicator might be able to provide you with pools to view. Keep in mind that water colour may differ slightly as variations in shade and contrast are natural. Water depth, angle of sun and the surroundings also affect water colour.
