Pebble interiors are the finish of choice for more than 90% of swimming pools built in Australia. Skypebble gives a strength and natural style to a pool that no other surface can provide. Skypebble is a beautiful smooth quartz stone that has been tumbled and polished naturally by rivers and oceans. Skypebble has been geologically tested for hardness, angularity, content and size to ensure a stronger bond with the cement materials, making for a smoother more durable surface. Skypebble will enhance the value of every swimming pool, spa and surrounding landscape by providing a colourful and durable finish. If you are looking for strength, beauty, versatility and value for money, be sure to ask for Skypebble.
